Professional Summary

Frontend Software Engineer with 7 years of experience building scalable React.js and TypeScript applications across Commercial & Investment Banking and enterprise domains. Passionate about performance optimization, reusable component architecture, and building reliable real-time user interfaces.

Skills

Languages: HTML5 | CSS3 | JavaScript (ES6+) | TypeScript

Frameworks & Libraries: React.js | Next.js | Redux Toolkit | Node.js | Storybook

Testing: Jest | React Testing Library | Playwright

Tools & Platforms: Git | GitHub | Jira | Figma | AWS | REST APIs

Professional Experience

JPMorgan Chase & Co. | *Software Engineer II*

Mar 2026 – Present

- Built and enhanced React.js and TypeScript applications supporting post-trade workflows within Commercial & Investment Banking, enabling reliable real-time trade lifecycle management.
- Improved frontend responsiveness by eliminating unused code, optimizing rendering, and reducing unnecessary component re-renders, resulting in a faster and more maintainable application.
- Redesigned data fetching and state management to improve consistency of real-time trade information, reducing stale data scenarios across critical workflows.
- Developed reusable and configurable UI components aligned with the firm's design system, improving consistency and accelerating feature development.
- Investigated production issues through root cause analysis and implemented sustainable fixes that improved application stability and reduced recurring defects.

EY | *Senior Consultant*

Dec 2023 – Mar 2026

- Delivered enterprise React.js applications for financial services clients by building scalable and maintainable frontend solutions.
- Built reusable Storybook component libraries that standardized UI development and reduced duplicate implementation across applications.
- Implemented Micro Frontend architecture, enabling independent deployments and improving release flexibility across engineering teams.
- Improved application quality by implementing automated testing using Jest, React Testing Library, and Playwright, reducing manual regression effort.

HERE Technologies | *Software Engineer II*

Feb 2023 – Dec 2023

- Developed React.js applications for enterprise geospatial platforms, delivering responsive interfaces for map-based solutions.
- Improved application performance through rendering optimization, lazy loading, and code splitting, enabling smoother interaction with large datasets.
- Integrated REST APIs and reusable UI components to deliver reliable, responsive user experiences.

L&T Infotech | *Senior Software Engineer*

Oct 2019 – Jan 2023

- Developed enterprise React.js applications integrated with REST APIs for customer-facing business solutions.
- Built reusable UI components that improved development consistency and accelerated feature delivery across projects.
- Improved frontend performance through component refactoring, efficient state management, and application optimization.

Education

Bachelor of Science in Information Technology

2016 – 2019

Shri Narsee Monjee College of Commerce & Economics, University of Mumbai
